CHANGE IDEAS

High Functioning Success Teams	 Access to and regular use of user friendly data (weekly) Team huddles (short standing meetings) Trauma-informed lens in curriculum Regularly make meaning of norms during team meeting time 	 Team collaborates to create a purpose statement for team's work (Ground team in the "why" of what they do) Use NCS Freshman Success Inventory on a regular basis throughout the school year to monitor progress toward team goals 	 Co-create a list of team norms, routinely return to norms to ensure they support team learning and work Construct team retreat time that focuses on building community and trust rather than the regular FS work 	 Create specific roles for each team member, alternate roles and responsibilities Team members visit other school teams and report back key take-aways Structure the meeting room setting in ways that embody collaboration and community
Developmental Relationships	 3x3 Model Classroom assignments that include student self reflection w/ feedback Teacher processing student feedback with another person Teacher use of scripts: "I have ex- pectations, I know you can meet my 	 expectations, I will help you to be successful" Teachers ID other ways to interact with students (e.g. coaching, sponsor clubs, etc.) Teachers use classroom time to invite students lives into class on a regular 	 basis, beyond a BOY interest survey Foreground relationship building over content for days/weeks Teachers ID ways to share power with students in daily lessons 	 Teachers devote department/course team time to examine their own identity Teachers use exit slips to monitor how students are learning and what they are/are not connecting to in class
Culturally Responsive Instruction	 Employ standard-based grading practices that include regularly occurring written/oral feedback to students Co-create a list of learning norms with students, routinely return to norms to ensure they support learning 	 Regularly make meaning of norms during class Monitor the amount of teacher vs student talk time during class Begin class with activities that relate to student experience/life connections as an entry point for content/skills 	 Teachers examine each other's grade books and reflect on how student may interpret different methods of teacher communication Teachers use exit slips to monitor how students are learning and what they are/are not connecting to in class 	 Teachers ID ways to share power with students during class Teachers examine language used in class and explore how some frequently used words may or may not carry negative connotations for students
Student Agency, Integrated Identity, and Competency	 Developmental experiences—student refin classes through time Student interest surveys via Google surve (content, get to know you). Students fell cared for when survey data is used or re Easy to implement. Easy to read data. Postudent engagement. 	are not connected to othe (Connect student with ac t heard and ferenced. organize and regularly in groups that reflect the di	er students in school connection tivities outside of class) teract with student focus	ent capacity to lead (freshman n, mentoring, classroom, etc.)
